(Number of Cells)

- Normal (3036)
- CCl4.induced.injury (3510)

umap_2

umap_1

The figure is a UMAP plot with 'umap_1' on the horizontal axis and 'umap_2' on the vertical axis. It displays two main clusters of cells. The 'Normal' cluster, represented by blue dots, is located on the right side of the plot. The 'CCl4.induced.injury' cluster, represented by red dots, is located on the left side. There are also smaller, more dispersed clusters of cells, including a small red cluster at the top and a small mixed cluster at the bottom right. The overall shape of the main clusters suggests a transition or relationship between the two states.
